Overview

Scope

This document is a user manual for Qualtrics Data Integration. It contains all relevant information relevant for this integration that has been implemented in the Dapresy system.

Purpose

The purpose of this document is to provide an overview of Qualtrics Data Integration and how to use it in the Dapresy system.

Getting Started

Integration Overview

This API allows you to export survey data from Qualtrics (<https://www.qualtrics.com/>) directly into Dapresy to be used as a data source.

Pre-Requirements

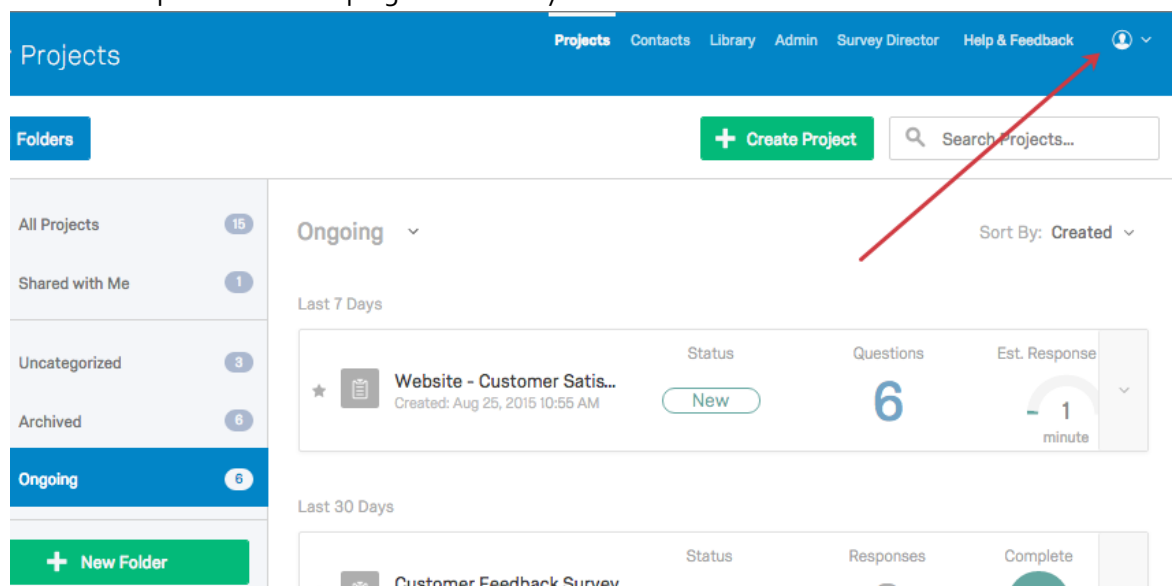

In order to use this Qualtrics Data Integration, you will need to have an account on Qualtrics with the API feature enabled. This will allow you to create an API token. An API token is a mandatory parameter for this integration into Dapresy.

Another important parameter is the API base URL which will include the path to the API. Qualtrics has multiple URL's for APIs, so it depends on the end user's location.

How to Create an API Token

Follow these 5 steps to create an API Token:

1. Log into Qualtrics
2. Click on the person in the top right corner of your account

3. Select **Account Settings**

The screenshot shows the Qualtrics 'Projects' page. The top navigation bar includes 'Projects', 'Contacts', 'Library', 'Admin', 'Survey Director', and 'Help & Feedback'. A user profile icon in the top right corner has a dropdown menu open, showing 'quinigensis', 'Qualtrics Demo', 'Account Settings...' (highlighted with a red box), and 'Refresh Account'. On the left, a 'Folders' sidebar lists 'All Projects' (15), 'Shared with Me' (1), 'Uncategorized' (3), 'Archived' (8), and 'Ongoing' (6). The main content area shows a list of projects under the 'Ongoing' filter. The first project is 'Website - Customer Satis...' with a status of 'New', 6 questions, and an estimated response time of 1 minute. A second project, 'Customer Feedback Survey', is partially visible below.

4. Click **Qualtrics Ids** on the navigation bar

The screenshot shows the 'My Account' page. The top navigation bar is the same as the previous page. Below the header, there is a sub-navigation bar with four options: 'User Settings' (with a person icon), 'Upgrade Account' (with a star icon), 'Account Usage' (with a document icon), and 'Qualtrics Ids' (with a gear icon and highlighted by a red box).

User Settings

The 'User Settings' page is divided into two sections. The first section, 'Change Password', contains three input fields labeled 'Old Password', 'New Password', and 'Confirm Password', followed by a green 'Change Password' button. The second section, 'Change Time Zone', features a 'Time Zone' label and a dropdown menu currently set to '(GMT -07:00) Mountain Time (US & Canada)'.

5. In the box labeled API, click **Generate Token**

The screenshot shows the 'My Account' page with a blue header. Below the header is a navigation bar with links: User Settings, Upgrade Account, Account Usage, and Qualtrics IDs (which is active). The main content area is titled 'Qualtrics IDs' and contains two tables. The first table, 'Surveys', lists various surveys with their IDs. The second table, 'User', shows the user's ID and organization. Below these is the 'API' section, which includes a 'Token' field, a 'Link' field with a button for 'API Documentation', and a 'Generate Token' button highlighted with a red box. At the bottom is the 'Libraries' section, showing a 'My Library: Qualtrics Demo' with its ID.

| Surveys | |
|---|--------------------|
| Customer Feedback Survey | SV_c09II08SruGP4C9 |
| Customer Satisfaction | SV_3I7xL3muiuo1QGx |
| Filter Exercise | SV_b3DuOjob4dAmN0x |
| Filtering | SV_0BQsb3JIIEMoFAV |
| First Project | SV_esvX2tVlosk9EtT |
| First Question? | SV_7QkPIpjOJR6TD5X |
| Future All Questions? | SV_8CwwWXjJxVHfdD |
| Genesis Shotgun Quiz | SV_6rFOsU6SvdYMQBL |
| How Well Do You Know Qualtrics? | SV_9XrtKIPbR9AzoN |

| User | |
|-----------------|--------------------|
| User Id | UR_cxdR95SBY2b8duJ |
| Organization Id | qunigenesis |

| API | |
|-----------------------|-----------------------------------|
| Token | |
| Link | API Documentation |
| Generate Token | |

| Libraries | |
|--|--------------------|
| My Library: Qualtrics Demo | UR_cxdR95SBY2b8duJ |

NOTE: Do not click the 'Generate Token' if you already have a token. An API token only needs to be generated once. **If you generate a new token while you have existing integrations using the old token, then those existing integrations will need to be updated with the new token.**

How to Create the Correct URL

Follow these 2 steps to create a base URL:

1. Go to <https://qualtrics.com> and login with your account
2. After you log in, you will be redirected to the nearest Qualtrics server, then just copy the base URL from your browser and add "API/v3" to that

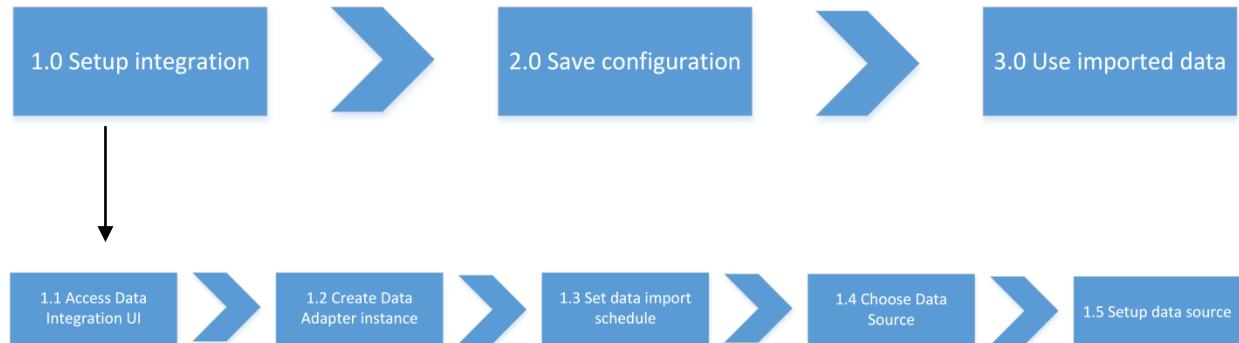

The screenshot shows a web browser window with the address bar displaying <https://co1.qualtrics.com/ControlPanel/>. The page content shows a blue header with 'My Projects' and a section titled 'Folders' with a folder icon. Below this is a section titled 'All Projects'.

Here we would have `https://co1.qualtrics.com/API/v3`

Using the System

Process Flow

The data integration process works like below:

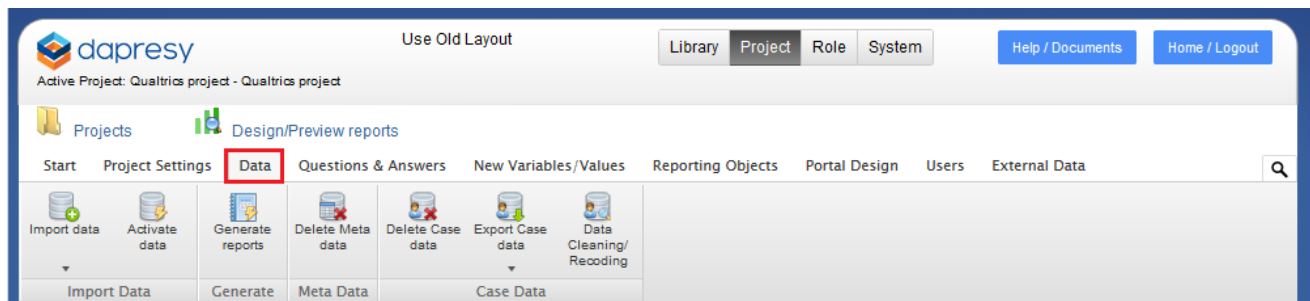

Setup Integration

To setup Qualtrics data source adapter, you must complete the following 5 tasks:

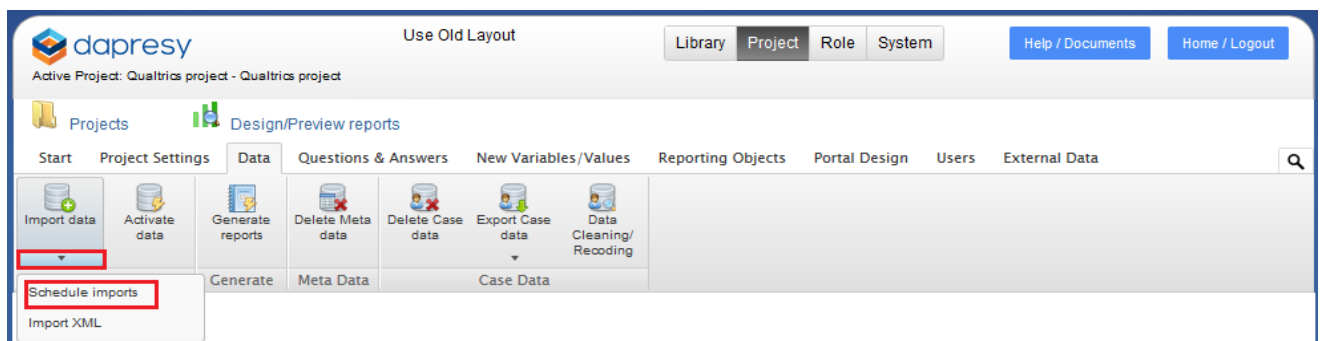

Task 1: Access Data Integration UI

To access Data Integration UI in Dapresy, please follow these 4 steps:

1. Log into Dapresy
2. Select the **Data** tab from the main menu

3. Click on arrow under **Import Data** and then select **Scheduler imports** from dropdown menu

Then the Data Integration UI will be opened

Import Scheduler

Create import schedule

Schedule name:

☒ Active

Import tag:

<no tag>

▼

Edit tags...

Import type:

Single import

▼

☐ Run import on save

Date:

02/26/2018

▼

Current server time: 2018-02-26 10:23:43

Time:

11:00

▼

Update to existing dataset(s): ☐

Select mapping variable

▼

Data options:

☐ Import Metadata

☐ Delete input variable data

☐ Activate Data

Data source:

FTP Server

▼

☐ Retry import if unsuccessful

FTP Server address:

FTP Username:

Password:

Secure FTP:

☐ (Only explicit FTPS is currently supported)

Data file name:

(* = wildcard)

Contact Email:

☐ Send email after job completion

☐ Send email after every task (eg. activation, generation of reports)

☐ Send email on job failure

Show logs

Save

Task 2: Create Data Adapter instance

Your first Data Adapter is automatically created when you access Import Scheduler UI for the first time. This screen contains all of the setup controls for the new data adapter instance. Some of these parameters are mandatory, and some are optional.

When you access this screen for the first time, you need to enter the **Schedule name** and check the **Active** checkbox.

Schedule name:

☒ Active

After the first Data Adapter has been created, then you can create another Data Adapter for the same project with different configurations. To create a new Data Adapter, just click the '**Create new**' button on Import scheduler UI.

Select import schedule

Selected import schedule:

The import schedule configuration form will be cleared for new parameters and configurations. Also, if you need to delete a Data Adapter, simply select the Data Adapter you would like to delete from the **Selected import schedule** dropdown list and then click the **Delete selected** button.

Task 3: Set Data Import Scheduler

Every Import Scheduler job can be scheduled to be triggered just once or to be repeated based on one of the following schedules:

- Hourly
- Weekly
- Monthly

You can select the schedule type from the **'Import type'** dropdown menu on the Import scheduler UI.

Import type: ☐ Run import on save

Single import

Weekly schedule

Monthly schedule

Hourly schedule

nt server time: 2018-02-26 10:48:14

When the **'Run import on save'** checkbox is selected, then the import job will be triggered immediately after the **Save** button has been clicked. Scheduled jobs will also be saved for the time that you select.

Task 4: Choose Data Source

To select a Data Source for your Data Adapter, use the **Data source** dropdown menu.

Data source:

By default, the data source is set to the FTP Server, but this should be changed to **Qualtrics**. When Qualtrics is selected as the data source, then the configuration form will be loaded on UI.

Data source: Qualtrics ☐ Retry import if unsuccessful

API Token:

Base URL:

Survey ID:

Survey List:

Time period: Total

When "Total" time period is chosen all data is imported without date filtering.

Load Survey List

Task 5: Set up Data Source

To set up the Qualtrics data source, two mandatory parameters are needed: API token and base URL. To learn how to create these, see Pre-Requirements on Page 5 of this manual.

To set up Qualtrics data source, follow these 7 steps:

1. Enter your unique **API token** from Qualtrics
2. Enter the base URL and API location of the Qualtrics API
example: `https://survey.qualtricsserver.com/API/v3`
(Note: it is important to include the API/v3 after the server name, this is used to correctly reference the API)
3. Click on the **Load survey list** button
4. The survey list will be populated with all surveys from Qualtrics that are linked to the provided API token

Data source: Qualtrics ☐ Retry import if unsuccessful

API Token:

Base URL: https://au1.qualtrics.com/API/v3

Survey ID:

Survey List: 0615903_Ancestry_FF_MultiCrossCell_Feb18
DAZN - German - CONTROL
0615801_Woolworths_Xmas_Campaign
0615895_HBF_PaperGirl_ReEdited_Music
0615922_Direct_Line_Mutt_MBM
0615627_UC Brand Incentive
0615901-5_Ancestry_Feb_2018_MotherShip_Screener
0615837_Churchill_Tattoo_AdCell1- MBM
0615896a_M2M_Recontact_HBF_PaperGirl_StandardM
0615748_Visit Canberra Benchmark
0615682_YouTube_Red_Snap_Up_AD_Test

Load Survey List

Time period: Total

When "Total" time period is chosen all data is imported without date filtering.

5. Select the desired survey, and the **Survey Id** field will be populated

Data source: Qualtrics ☐ Retry import if unsuccessful

API Token:

Base URL: https://au1.qualtrics.com/API/v3

Survey ID: SV_067d4RJOF07MoS1

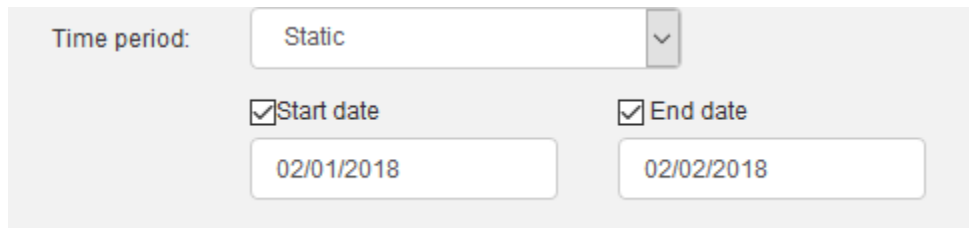

Survey List: 0615903_Ancestry_FF_MultiCrossCell_Feb18
DAZN - German - CONTROL
0615801_Woolworths_Xmas_Campaign
0615895_HBF_PaperGirl_ReEdited_Music
0615922_Direct_Line_Mutt_MBM
0615627_UC Brand Incentive
0615901-5_Ancestry_Feb_2018_MotherShip_Screener
0615837_Churchill_Tattoo_AdCell1- MBM
0615896a_M2M_Recontact_HBF_PaperGirl_StandardM
0615748_Visit Canberra Benchmark
0615682_YouTube_Red_Snap_Up_AD_Test

Load Survey List

Time period: Total

When "Total" time period is chosen all data is imported without date filtering.

6. Choose the time period for the selected survey's data. Select this from the **Time period** dropdown. If nothing is selected, then the system will load data from all respondents. If a specific date range is needed, then select the '**Static**' option from time period dropdown.

The screenshot shows a 'Time period:' label followed by a dropdown menu with 'Static' selected. Below the dropdown are two checkboxes: 'Start date' and 'End date', both of which are checked. Under 'Start date' is a text input field containing '02/01/2018'. Under 'End date' is a text input field containing '02/02/2018'.

7. The Start and End date controls will appear. Simply check the Start and End date check boxes and choose the specific dates from the calendars. Please refer to Dapresy documentation for details of all time selections available.

After completing these steps, the Qualtrics Data Adapter will be configured ready to use. The last step is to click '**Save**' at the end of the Import scheduler UI.

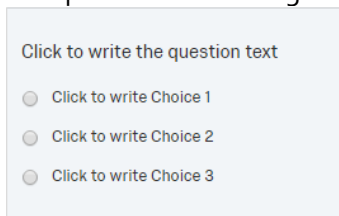

Supported Controls from Qualtrics Survey

After the Qualtrics Data Adapter has been configured, everything is ready to pull data from Qualtrics into Dapresy. **It's important to note that Dapresy can't support data from all Qualtrics survey's controls.** Qualtrics has many different controls that can be selected as survey questions. The data format in the backend of these controls can be different, therefore some of them are not currently supported by Dapresy.

Supported Controls

Below is the full list of survey controls currently supported by Qualtrics.

1. Multiple choice with single answers

The screenshot shows a survey question control. At the top is a text input field with the placeholder text 'Click to write the question text'. Below this are three radio button options, each with a placeholder text: 'Click to write Choice 1', 'Click to write Choice 2', and 'Click to write Choice 3'.

2. Multiple choice with multiple answers

Click to write the question text

☐ Click to write Choice 1

☐ Click to write Choice 2

☐ Click to write Choice 3

3. Text entry – single line

Click to write the question text

4. Text entry – multi line

Click to write the question text

5. Matrix – Likert – Single-choice answers

| | | | |
|----------------------------------|------------------------------|------------------------------|------------------------------|

7. Constant sum – Graphic w/Total

What percentage of your purchases are made with these cards?

| | |
|---|--------------------------------|
|  | <input type="text" value="0"/> |
|  | <input type="text" value="0"/> |
|  | <input type="text" value="0"/> |
| Total | <input type="text" value="0"/> |

[Replace From Library](#)

8. Constant sum – Text w/Total

What percentage of your discretionary money do you spend on the following items? (Total must sum to 100):

| | |
|---------------|--------------------------------|
| Entertainment | <input type="text" value="0"/> |
| Electronics | <input type="text" value="0"/> |
| Clothes | <input type="text" value="0"/> |
| Food | <input type="text" value="0"/> |
| Total | <input type="text" value="0"/> |

Additional variables

The Qualtrics API has a special field used for Response ID which is not shown in the metadata definition, but it is included in the case-data that is received from Qualtrics.

This field can be added as an additional open text variable in Dapresy Pro.

For example, a typical case data message looks like this:

```
"responses": [{
  "ResponseID": "R_4cdeZhZokaAXcCJ7",
  "ResponseSet": "Default Response Set",
  "IPAddress": "",
  "StartDate": "2018-11-30 21:35:11",
  "EndDate": "2018-11-30 21:35:11",
  "RecipientLastName": "",
  "RecipientFirstName": "",
  "RecipientEmail": "",
  Etc. ....
}]
```

Etc.

There is an additional open text variable to every Qualtrics respondent that is imported. It has the code "QualtricsResponseID" and Report Text "Original Qualtrics Response ID" which for the example includes the value R_4cdeZhZokaAXcCJ7 for this respondent. This makes it possible to trace respondents from the Qualtrics system in Dapresy Pro with a guaranteed unique value for each case.
